## REMARKS TO THE SPECIFICATION

**AMENDMENTS TO THE SPECIFICATION** are reflected in amended paragraphs [0081] – [0288], which begin on page 2 of this paper and replaces all prior versions of this Specification in the application. Applicant has made minor amendments herein to the specification to voluntarily correct certain instances of incorrect element callouts, grammar, clarify the claimed invention and thus Applicants amendments add no new matter. A substitute specification is provided on page 108 of this paper under 37 CFR 125(b) reflecting a clean sheet of the changes shown in the amendments to the specification and thus no new matter is added to the substitute specification.

## AMENDMENTS TO THE SPECIFICATION

[0081] The present invention is directed to a magazine-based data cartridge library that is capable of moving data cartridge magazines within the library, as well as moving individual cartridges within the library.

[0082] With reference to FIG. 1, the present invention is directed to a magazine-based data cartridge library 100 comprised of: (a) a frame 102 for supporting the other elements of the library; (b) a shelving system 104 for supporting at least two data cartridge magazines 101 wherein a data cartridge magazine 101 is adapted to hold a plurality of data cartridges (not shown); (c) one or more drives 106 that are each capable of writing and/or reading data to/from a recording medium in a data cartridge; (d) a magazine transport 108 for moving a magazine 101 within the library 100; (e) a cartridge transport 110 for moving a data cartridge between a magazine 101 and a drive 106; and (f) an interface 112 for communicating with a host computer (not shown) that uses the library 101 to store data.
